EDUCATION

1999 to 2001	**Master of Computer Science** Fergusson College, University of Pune
1996 to 1999	**Bachelor of Computer Science** Fergusson College, University of Pune

OTHER INTERESTS

I am an avid runner, marathoner, and cyclist. I also read SF and fantasy and enjoy the occasional first-person shooter. An unabashed geek, I follow the latest science news and tech blogs. My latest form of nerdy entertainment is tinkering with my Raspberry Pi.

WORK EXPERIENCE

Apr 2007 to Mar 2016	**D. E. Shaw India Pvt. Ltd.** Head of Design and User Experience

Lead designer and team manager of the design and user experience team.

- Client interaction: project initiation, requirement gathering, competitive analysis, presentation
- Interaction and visual design with high fidelity HTML mockups as deliverables
- Uniquely positioned to meet developers' needs with a background in coding
- Firm-wide HTML5, CSS3, and JS consultant
- Designed multiple products end-to-end:
  - Employee performance appraisal system
  - Recruitment and employee referral portal
  - Immigration and travel tracker
  - Roadmap tracker (with complete UI dev)
  - Trend analysis tool
  - Post trade workflow dashboard
  - Retail investment app (with complete UI dev)
- Designed new features and performed heuristic evaluation of existing products
- Maintained the firm's corporate websites
- Resource allocation, expectation management, project planning, status reporting, and performance appraisals

Oct 2006 to Mar 2007	**Microsoft India Dev. Centre** SDE, Unified Communication

Ported features from v1.0 to v2.0 of Microsoft Mobile Communicator, a WinCE 5.0 IM/VOIP client running in tandem with Microsoft Office technologies, required by changes in the underlying IM/VOIP framework. It was a short stint because of lack of UI work.

Oct 2005 to Oct 2006	**AmberPoint Technologies** Software Developer

Full product suite i18n from scratch, including the ability to manage web-services with end-points, APIs, and parameters with multibyte character names. Also responsible for a product called the Environment Monitor, which was AmberPoint's JFC/Swing UI.

Jan 2001 to Sep 2006	**Veritas Software India Pvt. Ltd.** Software Developer

I was a campus hire for Veritas. I worked on a UI integration platform in JFC/Swing called the Veritas Enterprise Administrator, the front end for an object bus used to remotely manage storage solutions:

- Design and development of the framework, product features, and components
- Profiling and performance testing; optimization
- Finding and fixing memory leaks, writing new client-server event mechanisms, implementing a single sign-on UI
